Foreword

I am the mother of five children whom I taught to fear God and give Him glory for all of His creation. We should enjoy God's creation, yet at the same time respect it. Abusive people are why morals, family values, and love for all living things are rapidly declining.

Contents

Nature	4
Farm Animals	6
Cats and Dogs	8
Wild Animals	10
Birds	12
Insects and Spiders	14
Ocean Life	16
Trees	18
Fruits and Vegetables	20
Love for God's Creation	22

Nature

Planning a vacation can be a lot of fun. Do not forget your binoculars and camera though, because you will want to capture all the beautiful sights you will see along the way to your destination.

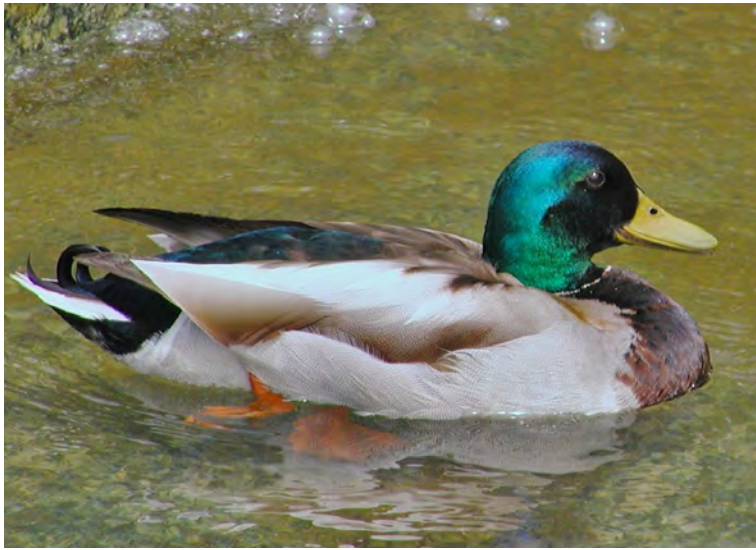

Mountains, lakes, colorful trees, especially the beautiful autumn leaves, are something you will want to capture with your camera, camcorder, or both.

If you are eating while sightseeing, don't forget to put any trash you may have, like sandwich or candy wrappers, or empty potato chip bags, in trash containers and not on the ground.

It is not nice to litter. It is also illegal to litter.

Farm Animals

Not everyone wants to live on a farm; however, for those who do, it is a great life.

Some children who live on a farm choose to make a pet out of one or more of their farm animals, such as a horse, cow, chicken, duck, or a lamb, if their parents have sheep.

Some families just raise llamas, emus, horses or cows. I suppose you can make a pet out of just about any of God's wonderful domestic animals.
